Paste in the Comment Code

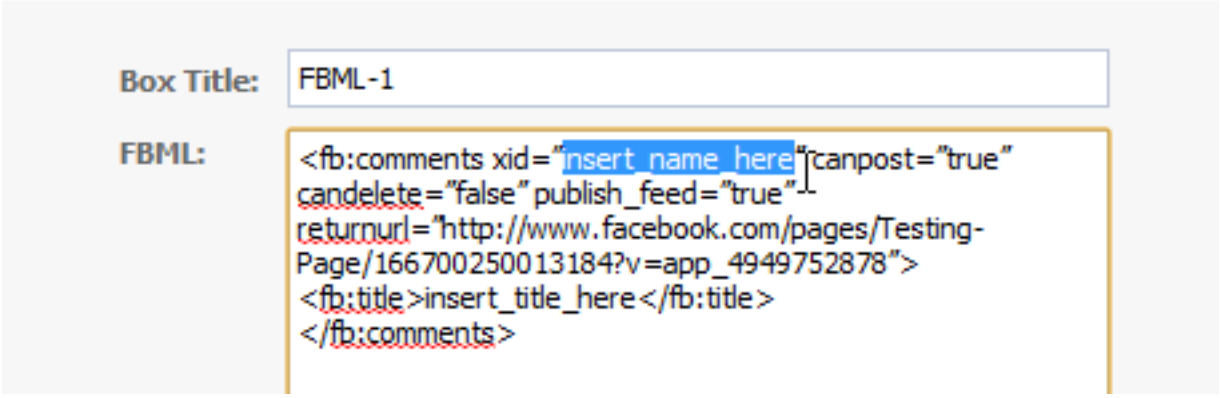

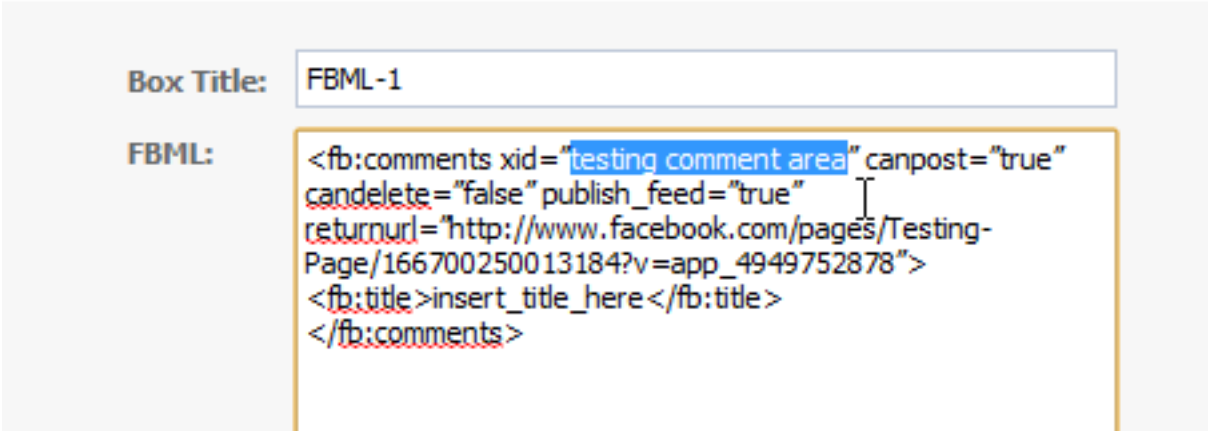

Insert the Fan Page tab URL that you copied into the Tesxt document and place it into the "insert_url_here" area. Make sure to leave the quotations in the code.

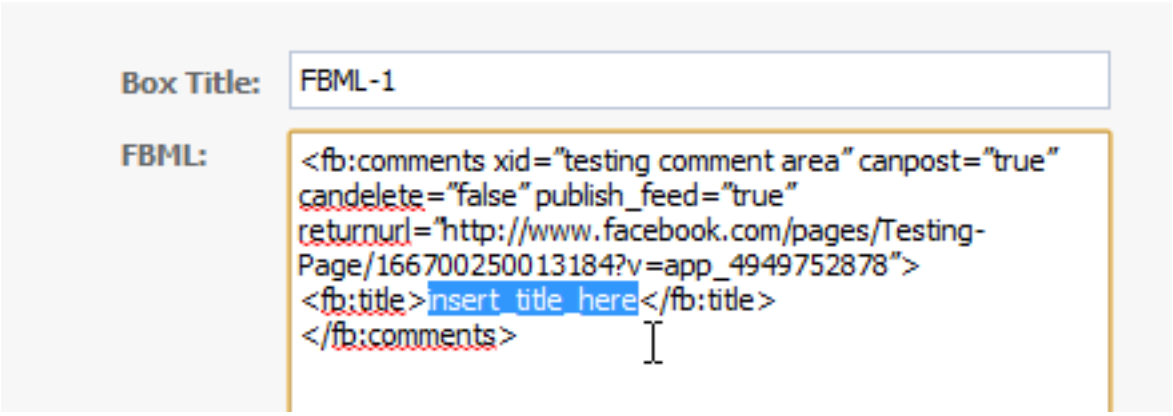

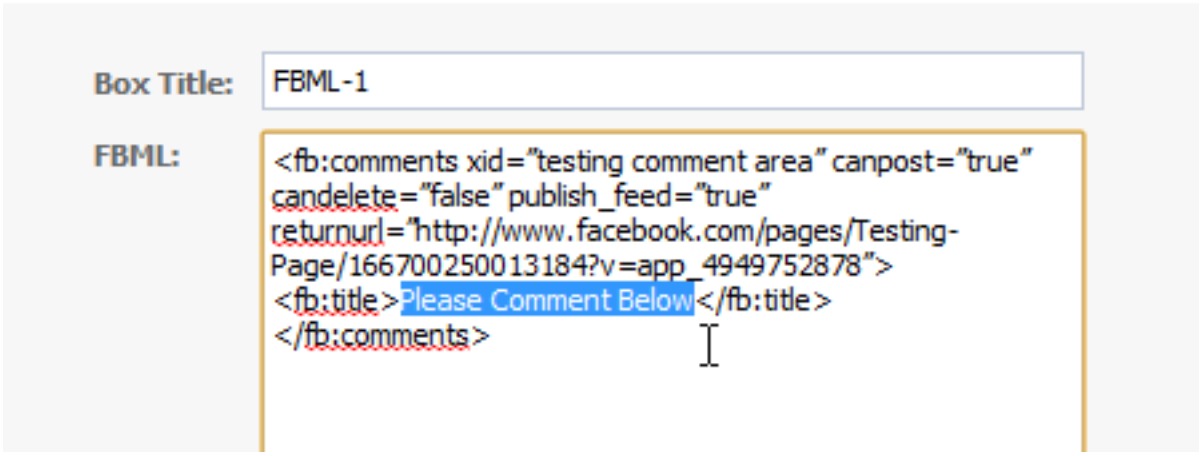

Change the "insert_name"here" code to anything you want. Just leave the quotes in.

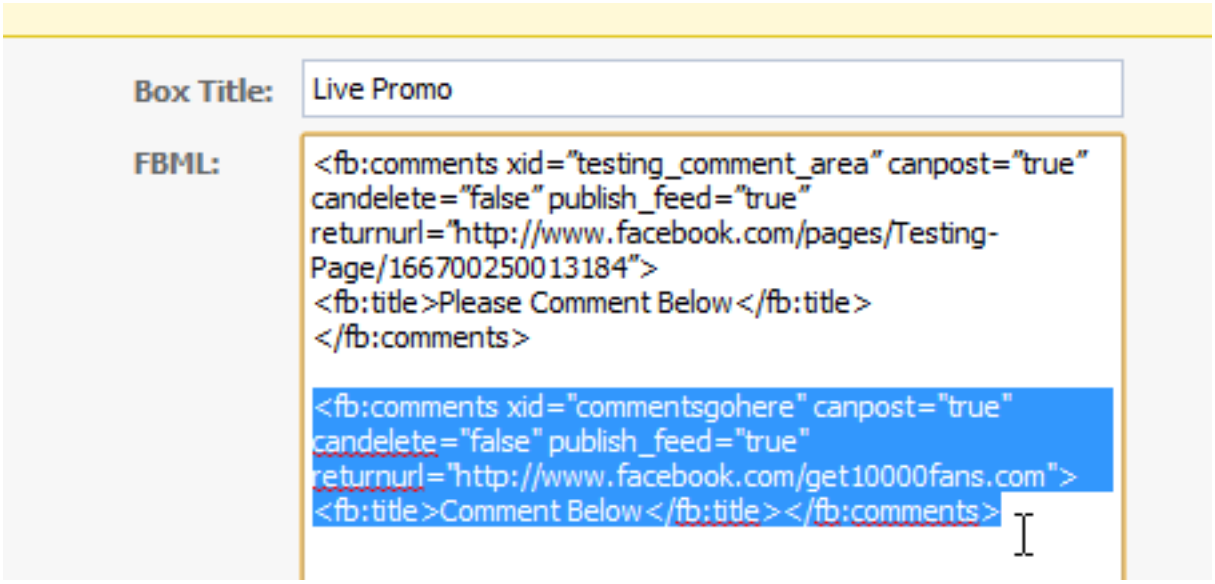

Label your comment area by changing the [insert title here] area. (this will display above the comment area)

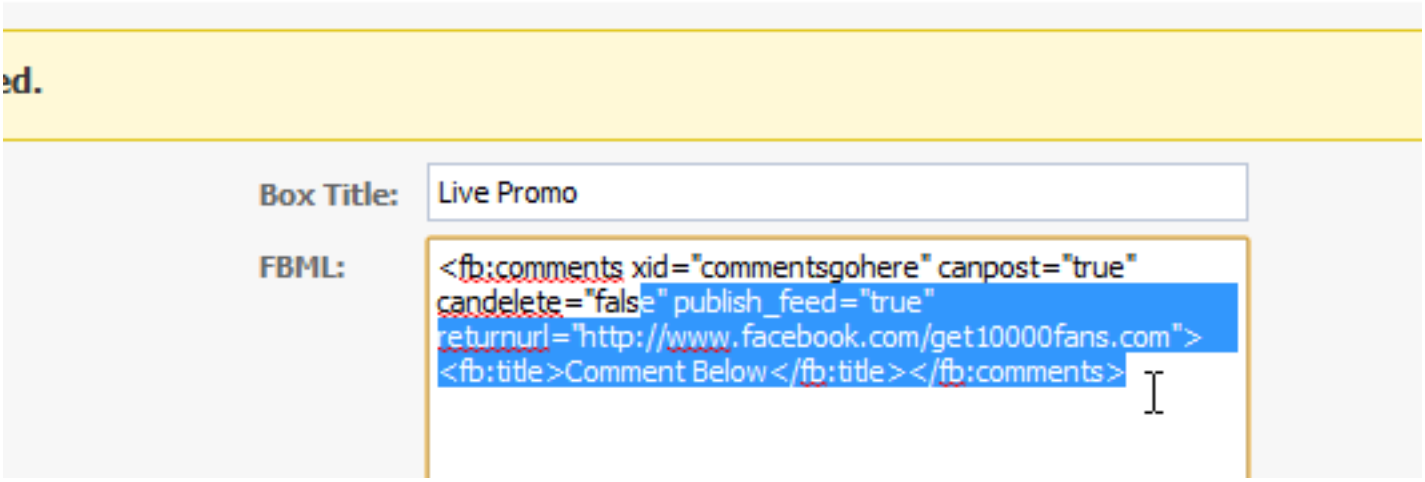

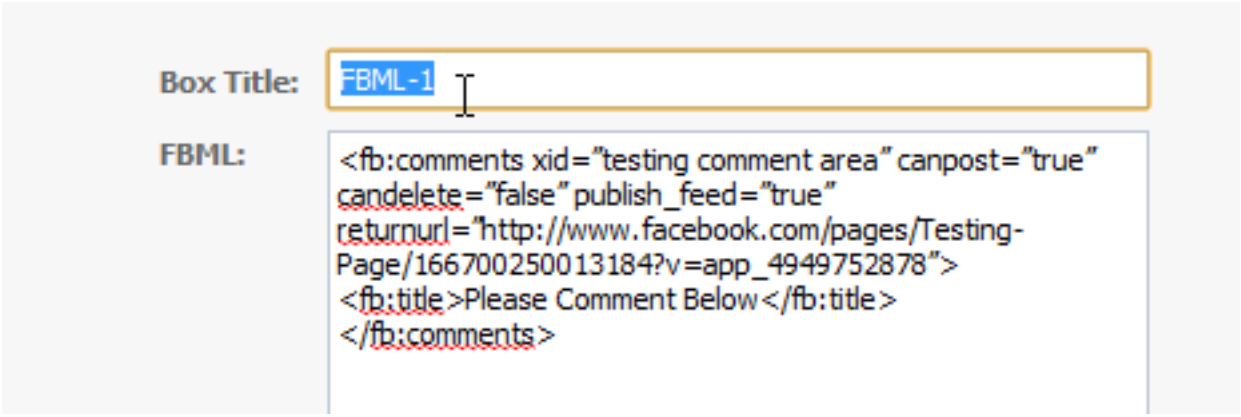

Now Hand Type the code underneath the code you just created. (Yes, this is a major pain...but Facebook hates copied code and we have to type it in ourselves if we want it to work.

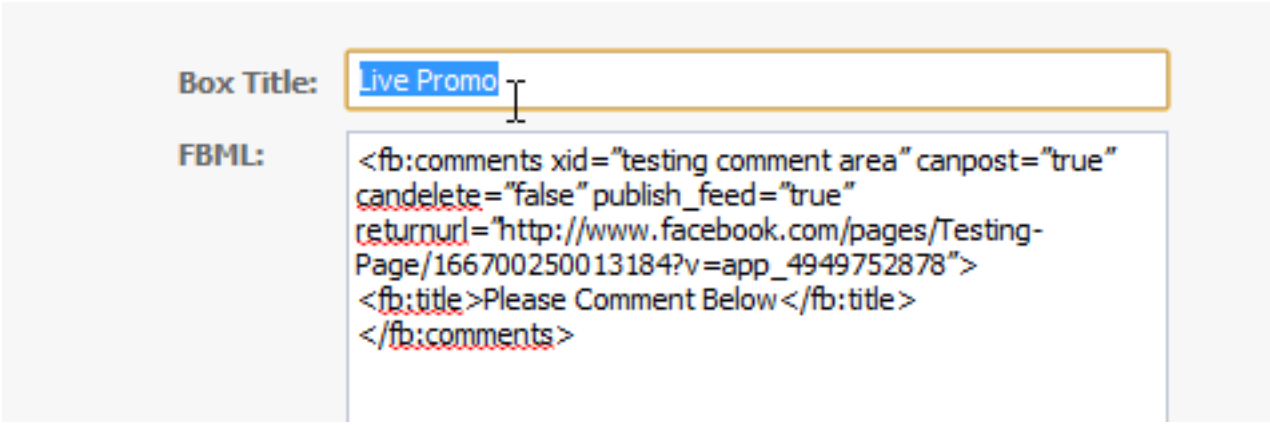

Delete the Code Above (that was copied in earlier)

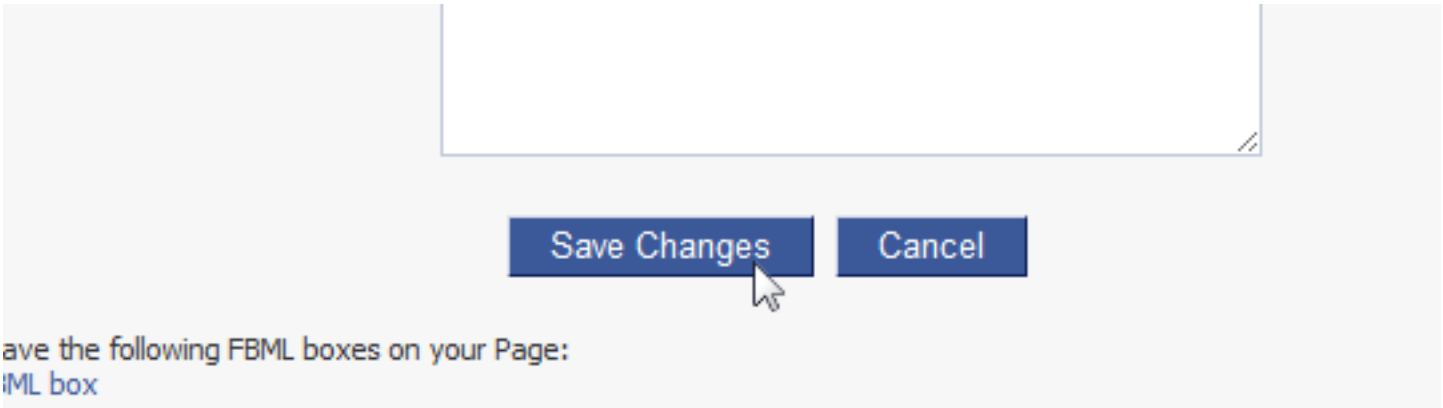

Give Your Tab a Custom Label

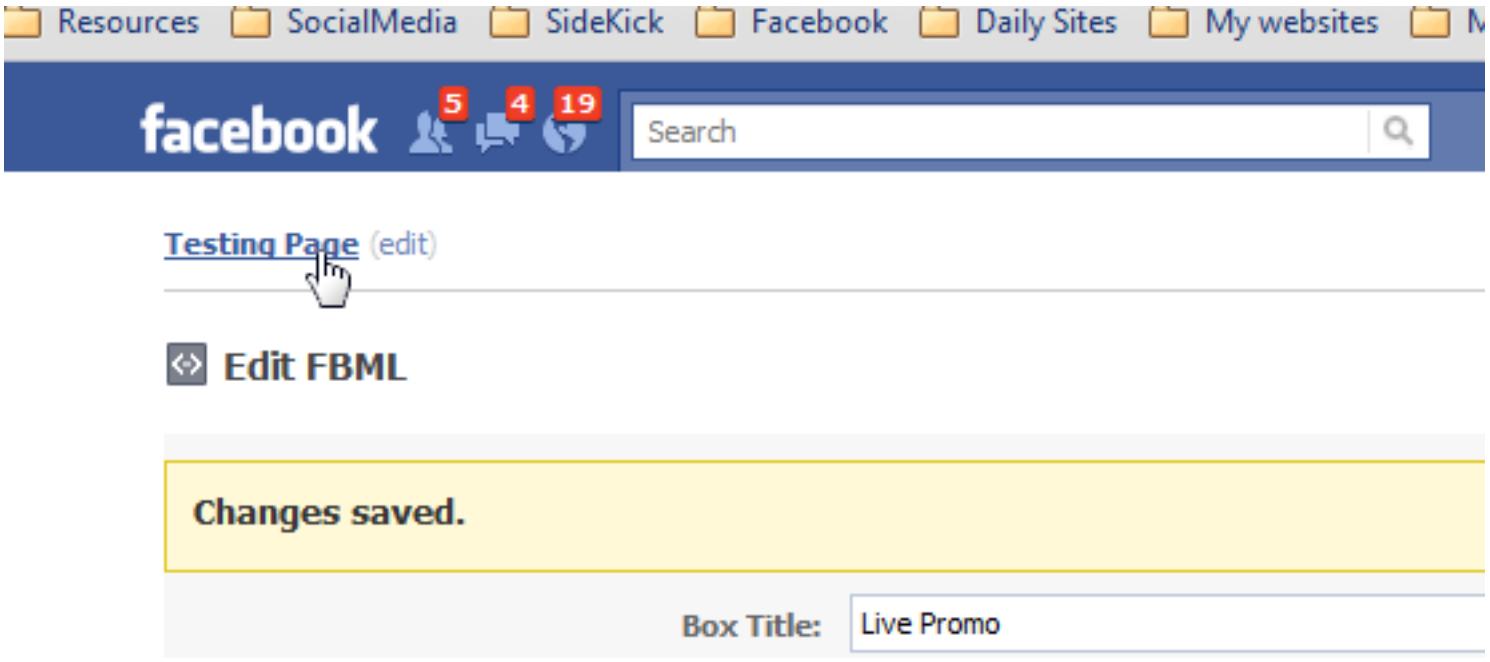

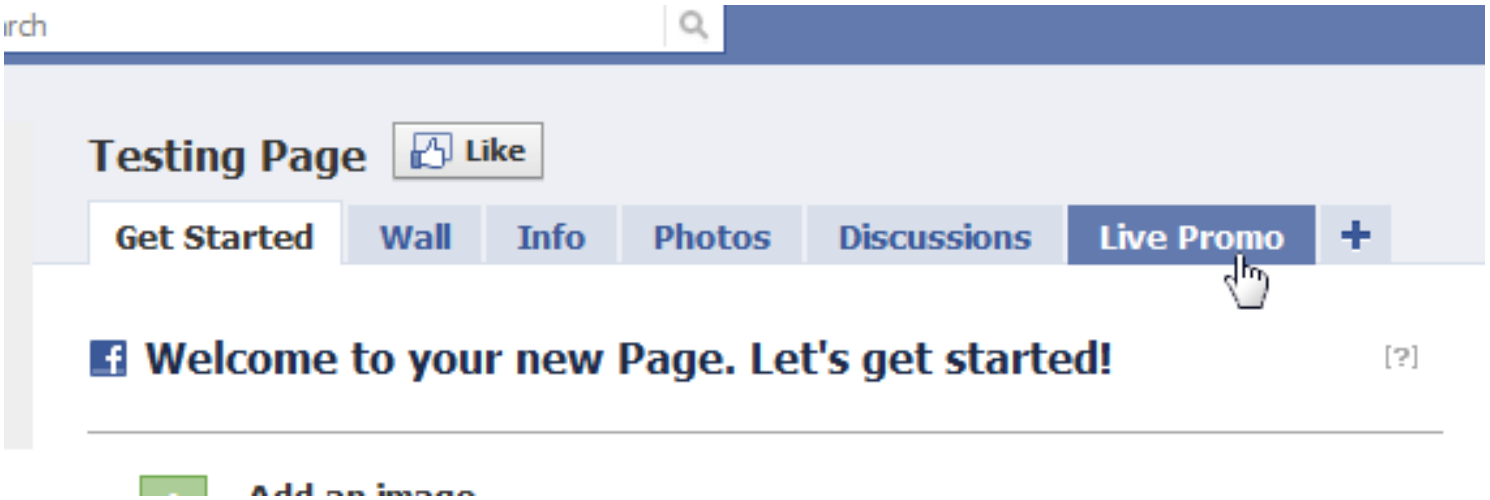

Save Your Application

Go back to your Fan Page

Navigate to the Comments Tab

Reveal Your New Comments Area!
